

A CENTURY OF INNOVATION

MIG with the appearance of TIG.
Graphic simulation of precision
layering with Aristo SuperPulse™

New! Aristo SuperPulse™ Heat critical. Weld perfect

New Aristo SuperPulse™ maximises welding productivity in thin and thick section stainless and aluminium alloys. Precise heat control combined with pulse action eliminates distortion and produces a perfect finish. Aristo SuperPulse™ delivers pulse/pulse, pulse/short arc and spray arc/pulse options, plus MIG brazing of ultra thin sheet material.

- Easier positional welding
- Uniform heat transfer and penetration minimises root gap variations
- Suitable for automated and robotic systems
- Extends the application range for larger diameter wires

Revolutionise your welding productivity with Aristo SuperPulse™.
